SpireCapture™ & AMR/AMI System
Data Viewing Software

SpireCapture™ & AMR/AMI Software

SpireCapture™ AMI Suite is an open platform, designed to be compatible with nearly every AMI Network on the market today. Its integrated Google® Mapping Tools and advanced Meter Data Management features provide an exceptional environment for managing, reporting, and analyzing advanced metering infrastructure and mobile data solutions. Leveraging the AWS Cloud software cloud, SpireCapture delivers super-fast performance bringing the Internet of Things (IoT) into any sized water utility.

- Addition to SpireCapture is compatible with nearly every billing system to the market and can provide added value and analytics to most Customer Information Systems.

SpireCapture™ & AMR/AMI Software

Smart Water Meter Data Management + Analytics

Data Presentation

Review of system consumption and make sense of it with a wide array of chart and map views. SpireCapture's Dashboard Overview is designed for easy graphical display Analyze system-wide consumption relative to precipitation to better understand environmental impacts on demand and utilize SpireCapture's consumption mapping tool for a graphical model of high-and-low consumption regions.
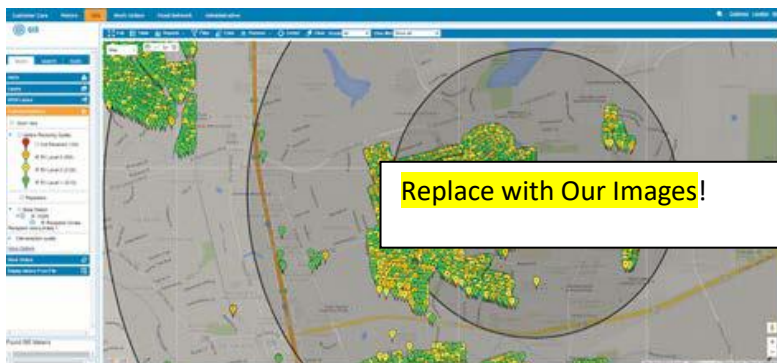

Google Integration

Geo-coordinate meter location information, Google Features such as Street view is an integrated window on the Google Maps. Create District Metered Zones (DMZ) in a few simple clicks with SpireCapture's analytics allows to easily measure water also included to provide quick loss. With Google Maps in SpireCapture's GPS Module can inspection of a service can also be used as location find prior to a service call and Mapping tools include: all Google Maps functionality.

SpireCapture™ Visibility Views

• Dynamic 2-way communication with Water Meters and field assets
• Scalable, Microsoft AWS™ Cloud hosted software supports any account size
• SpireCapture supports wide array of 3rd party data integration
• Cross platform SaaS works seamlessly with Windows and Apple environments
• Simple, scalable AMR > AMI technology migration

24/7 Monitoring

With SpireCapture, both water loss and network performance are monitored in real time. Client receive immediate notification of works true two-way communication capabilities with Reads and Data Logging directly from SpireCapture Quickly scroll and zoom through the network to view RF performance and health to preemptively manage issues before they become serious.

SpireCapture^{TM} Alerts

OneDrop and SpiRely meter Alerts can be setup per device.
In addition, notifications for theft and tamper are relayed
back to the Cloud for analysis and actions. Inactive meters
are also identified and queued for inspection.
Leak Alerts and Flow Monitoring assist in reclaiming lost
revenue from unaccounted for water and right-sizing for
demand.

Bi Directional Communication

In-Field, two-way communication allows for
minute-by- minute analysis of consumption.
Quickly and easily request an on-demand data
log to view 15-minute interval reads.
Remote programming of Meters and Remote
Firmware
Upgrades are also available through
SpireCapture Bi Directional.
